

## 1001\_M7\_Creating\_Reports\_&\_Dashboards\_Quiz

1. Which of the following are possible options when editing a dashboard? (Choose all that apply).
  - ☒ A. Add an output.
  - ☐ B. Export a dashboard panel.
  - ☒ C. Modify the chart type displayed in a dashboard panel.
  - ☒ D. Drag a dashboard panel to a different location on the dashboard.
2. What naming convention does Splunk recommend for dashboards?
  - ☐ A. Description\_Group\_Object
  - ☐ B. Group\_Description\_Object
  - ☒ C. Group\_Object\_Description
  - ☐ D. Object\_Group\_Description
3. How can search results be retained for more than 7 days?
  - ☒ A. By scheduling a report.
  - ☐ B. By sharing a job link.
  - ☐ C. By updating the job settings.
  - ☐ D. By changing the time picker to more than 7 days.
4. In a dashboard panel built from a report, which statement is correct?
  - ☐ A. You can modify the search string in the panel, and you can change and configure the visualization.
  - ☐ B. You can modify the search string in the panel, but you cannot change and configure the visualization.
  - ☒ C. You cannot modify the search string in the panel, but you can change and configure the visualization.
  - ☐ D. You cannot modify the search string in the panel, and you cannot change and configure the visualization.
5. What is one advantage of creating dashboard panels using reports?
  - ☐ A. The report will be included in every new dashboard by default
  - ☐ B. There are no benefits of creating dashboard panels from reports.
  - ☐ C. It makes the dashboard more efficient because it only has to run one search string.
  - ☒ D. Any change in the underlying report will affect every dashboard that utilizes the report.

6. What is a Splunk best practice for naming reports?
- A. Reports should be names with numbers so they can easily be sorted
  - ☒ B. Use a consistent naming convention so they are easily separated by characteristics such as group and object.
  - C. Create random unique names to avoid any overlap.
  - D. Any naming convention is fine as long as you keep an external spreadsheet to keep track.
7. What kinds of searches can be saved as reports?
- ☒ A. Any search can be saved as a report.
  - B. Only searches that generate visualizations.
  - C. Only searches containing a transforming command.
  - D. Only searches that generate statistics or visualizations.
8. What is the recommended method for creating multiple dashboards that use the same search data?
- ☒ A. Save the search as a report and use it in multiple dashboards as needed.
  - B. Save the search as a dashboard panel for each dashboard that needs the data.
  - C. Save the search as a scheduled alert and use it in multiple dashboards as needed.
  - D. Export the results of the search to an XML file and use the file as the basis of the dashboards.
9. How can another user be granted access to a saved report?
- ☒ A. The owner of the report can edit permissions from the edit dropdown.
  - B. Only users with Admin or Power User role can access other users' reports.
  - C. Anyone can access any reports marked as public within a shared Splunk deployment.
  - D. The owner of the report must clone the original report and save it to their account.
10. If a search is saved directly to a dashboard panel instead of first being saved as a report, what is created?
- A. Cloned panel
  - ☒ B. Inline panel
  - C. Report panel
  - D. Prebuilt panel
